**syncpointe**

MARINUS Partners is an innovative women-owned business consulting and technology services firm with a unique delivery model. We bring value to clients by engaging a team of seasoned professionals and leveraging our powerful network of member firms. As a result, our clients are assured of getting the high-quality, cost-effective solutions they seek.

## MOBILE WIRELESS MANAGEMENT

Syncpointe provides mobility service monitoring, automated policy management, guaranteed expense reduction software and services and advanced device security and communications encryption.

Syncpointe leverages our multi-module, integrated proprietary software framework, Mobilepointe, to deliver customized solutions to Enterprise, Government & Consumer Oriented Clients and Operations worldwide.

Mobilepointe is a pioneering technology in the global mobile space. The software provides, within a network agnostic and mobile OS ubiquitous framework, the capability for dynamic formation, express creation, and deployment of mobile applications and services.

Syncpointe's solutions are readily deployed and white label capable.

**Syncpointe  
gives you the  
ability to monitor  
and control all aspects  
of Wireless Devices and  
Aircards globally.**
